

# Box Wrapping Machine

Box Wrapping Machines are designed to wrap boxes and related items from safety and protection of the products. These Wrapping provides extra support movable and manually operated rotary turn able device used to stretch film and wrap the product. The operator places the product to be wrapped on the platform and adjust the vertical rods to secure the product according to the size of the product, and then the wrapping process begins. The operator presses the start button and the packing process begins. The machine packs the luggage by a three to five layers of stretch film.

## SALIENT FEATURES:

**Pre Stretch Mechanism:** The Pre Stretch Mechanism has been designed with AC geared motor with variable speed to enhance the durability of the system. This system is equipped with a provision of provide a stretch of three variations of 200%, 250% and 300% to suit the quality of the film.

**Turn Table:** Turn Table is rotated with A-1 Hp Dc geared motor with variable speed drive. This will increase the productivity of the Machine depending on the size of the carton boxes. Our turn table is also provided with A 300 mm projected table to ensure the coverage of the film on the sides of the package. The table is also provided with mechanical package arrestor to reduce the fatigue of the operator.

SPECIFICATIONS	BOX WRAPPING
Turn Table Diameter	600
Turn Table Speed Variable	Upto 40 Rpm
Prestretch	200%
Maximum Stretch	300% (depending On Film Quality)
Power Consumption	0.75 Kw
Power Supply	220v, 50 Hz
Height from Ground Level	815 Mm
Consumable Used Lidpe	Stretch Film
Stretch Variation	100 To 300%
Film Thickness Range	100 To 35 Micron
Film Width Range	250 To 500 Mm

# Automatic Pallet Stretch Wrapper

Stretch Pallet Wrapping Machines are used to stretch wrap film around a loaded pallet. The wrapping provides extra support and security while the products are being additionally wrapped loads can be easily separated and identified and can be easily handled. Stretch Pallet wrappers are widely used in electronic, food industry, coir products, beverages and home appliances industry. The machine has Auto Pneumatic clamp and cutting assembly thus increasing the efficiency and saving time. The machine has height sensor with top and bottom wrap counters, with the option of reinforcement wrap the machine has pre-stretch facility.

## SPECIFICATIONS

Turn Table Motor	1.5 KW. Single phase
Film-rack Lift Motor	0.4 KW Single phase
Dimension of Machine	2700I X 1600w X 3300H (mm)
Max. Packing Height	2600 mm
Max. Packing Weight	2000 Kg
Diameter of Turn Table	1500 mm
Machine Weight	800 Kg
Power Supply	220 V. Single phase 50 Hz
Turn Table Speed	1-10 RPM
